

2016 Willis Mountain Trip
by Bill Curtin

I am a land surveyor by trade a rock hound by the grace of god debbie and I did not know what to look for on our first trip to the quarry we took multiples of the ones we knew and one of everything else that looked cool we did ask the geologist on site some questions about the type of rock we picked up two Virginia clubs have geologists as members that was helpful so being a surveyor I would estimate we made Willis mountain a few feet shorter on Saturday all in all a great trip.
